- **Worked in**: Python, C, C++, PHP
- **Interests**: Backend Development, Frontend Development
- **Tools**: Postman, Git, Chrome DevTools

## PROJECTS

**Let's SMIT**  November 2019 – Present | *SMIT*
- MEAN stack project for college to help students with daily activities.
- Implemented daily routine and mess schedule.

**GPA Calculator**
- The semester grades for our college are published subject wise and it is a pain to visit each subject individually and search for our enrollment number among hundreds in each subject to check our marks.
- This project utilizes a python script to scrape results of all students for all subjects from the collection of results.
- The website provides a simple interface to search for compiled result for a given enrollment number for all subjects at one place.

**Other Projects**
- Dynamic Homepage and To-Do List
- Amazon Product Price Tracker

## CERTIFICATIONS

**Interactivity With JavaScript** – **Coursera**
- http://coursera.org/verify/4GNTK5YKNLB5

**Angular & NodeJS - The MEAN Stack Guide** – **Udemy**
- https://www.udemy.com/certificate/UC-MQNE5HIG/

## ADDITIONAL

- Represented university at IIT Guwahati's cultural fest - Alcheringa
- Active member of the debate society.
- Host for numerous events.
